EDUCATION

- **MIREA - Russian Technological University** Moscow, Russia
Specialist degree in Cybersecurity, BK-252 *September 2018 - Present*
Relevant courses: Operating systems, Methodology of programming(C++)(algorithms and data structures), Database management systems, Verification methods, Calculus, Abstract algebra, Discrete math, Probability theory, Cryptography

SKILLS SUMMARY

- **Programming languages:** C/C++17/C++20(advanced), Golang(intermediate), Rust(elementary), SQL(elementary)
- **Platforms:** Linux
- **Languages:** Russian(C2), English(C1)
- **Other:** Git, Docker, Cmake, PostgreSQL, LaTeX

PERSONAL PROJECTS

- **Synchronous serial lock-free mutex for stackless coroutines C++20** github
Concurrency themed project for modern C++ that allows concurrent execution of coroutines.
- **CRISP (Cryptographic Industrial Security Protocol)** github
Implemented all the necessary cryptographic primitives for CRISP protocol.
